

Title	CLILstore: creating web content for language learning
Brief description of clip	This video is aimed at language teachers. It provides a step-by-step guide on how to embed a video-clip into an internet text page, add any text (or transcription) to the text page, link all the words of the text to an online dictionary, and link to other electronic practice exercises, such as Hot Potatoes. The CLIL store project was funded by the EU.
Difficulty rating of production (easy/intermediate/complex)	Easy to intermediate
Recommended CEFR level	A2+
Technical details	Clilstore is a multifaceted site which (i) caters for teachers who wish to create or find multimedia language learning units to use with their students and (ii) offers a repository of language learning units in a variety of languages which students can access directly and use independently.
Suggestions (preparation/pre and post activities)	Students are also welcome to register as authors and create and share units. The repository of existing units is open access, therefore, teachers or students wishing to use existing units do not have to register with the service before viewing or using the materials. Anyone wishing to create units must first register and have their email address verified. The authoring interface has been designed to be user-friendly, however, new users are encouraged to read the step by step guides provided on www.languages.dk/tools and if possible to avail of one of the many training workshops offered by the Tools team.
Ideas for application in different contexts	The emphasis in Clilstore units is on multimedia i.e. using combinations of video, audio, images, text, hyperlinks and supporting secondary technologies which allow for the creation and sharing of interactive language exercises etc. In order for Clilstore language learning units to be most effective, however, they should contain a significant amount of text. The reason for this is that a key element of what makes Clilstore a unique language learning service is the way the software treats embedded texts. At the touch of a button all words are automatically linked to our bespoke dictionary interface <i>Multidict</i> , which places online dictionaries in over 100 languages at the learner's
