

Title	<a href="#">Life hacks - using video to make boring things fun</a>
Brief description of clip	Jamie Keddie contributed this session to our Video for All Live! Conference. He encourages us to embrace to potential of role shifting, empowering learners to take control of the recording and editing processes to become creators of content, making video stories. He uses the example of vloggers to inspire teachers to capitalise on informal learning opportunities.
Difficulty rating of production (easy/intermediate/complex)	easy
Recommended CEFR level	B1+
Technical details	<p>Learners can set up their own YouTube or Vimeo channel in order to share a homework task which requires that they make a video for sharing.</p> <p>They will need a recording device (mobile phone or tablet with internet access) in order to upload content. Free editing software can be used (such as <a href="#">Freemake</a>) to tidy up the clip prior to uploading. This sort of sharing is often informal and technically not very advanced.</p> <p>Students need to be aware of copyright and <a href="#">Creative Commons</a> licences, see guidance on Video for All website. They may need advice on safety online and guidance on appropriate presentation and language use. You could recommend that when they upload their content they share privately at first and don't go public until it has been reviewed.</p>
Suggestions (preparation/pre and post activities)	<p>Task types include:</p> <p>Life hacks - a demonstration of something which makes life easier, everyone's an expert at something.</p> <p>review videos - review a game/book to share</p> <p>Haul videos - show and tell for example what you bought at the shops</p> <p>Food videos - recipes and meal descriptions (can be commentary only)</p>

	<p>get ready with me - daily routines List videos - 50 things about... These genres can help to inspire the creation of a task that is suitable for your context.</p>
Ideas for application in different contexts	<p>Can be applied to all sectors and communities for formal and informal learning. There are large communities of gamers, teachers, sports people etc. who share ideas in this way.</p>
